## PRESS INFORMATION

Like 50/125/150

The brand new designed 4V technology engine has an increase of 1.4kW compared to its predecessor (125 cc). It provides smooth and linear output throughout its power band.

### **Brand New Designed 4V Engine**

The roller rocker arm in the engine reduces friction within the valve driving system. The lightweight cylinder head further enables the engine to generate ample power throughout the entire spectrum of speed.

(more)

### Quiet Ride

KYMCO Like employs several advanced engine mechanisms to reduce the operational noise for a quiet ride.

- High rigidity cam shaft holder minimizes the friction sound from valves
- Better cam shaft-balance optimizes performance efficiency
- Use of helical gear in the transmission reduces gear running sound
- A bearing tensioner design reduces possible cranking noise at high rpm
- Intake confined within resonance compartment reduces low frequency noise

### **Steady and Comfortable**

The KYMCO Like utilizes an exclusive S.S.C. horizontal engine support frame to help balance the weight transfer between the engine and the frame. It further prevents the lifting effect during acceleration and significantly improves the comfort of your ride.

(more)

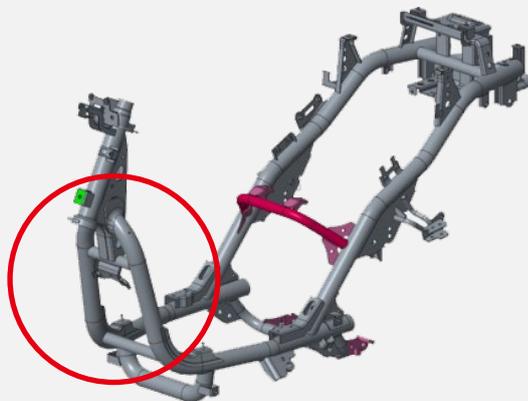

### Better Balance and Stability

The fuel tank of the KYMCO Like is positioned in front and under the floor to lower the center of gravity for increased balance.

### High Rigidity Frame Design

The new KYMCO Like is equipped with a front bi-beam frame design which increases the torsion resistance and provides more stability and comfort.

### Large Under-seat Storage

The under-seat storage compartment is large enough for an open face helmet and accessories.

(more)

### Full LED Lightings

The KYMCO LIKE comes with LED lightings, adding a distinctive charm of modern design. It provides the brightness required, and consumes less energy than traditional bulbs.

#### Front LED Headlight

The wide coverage of the bright LED headlight ensures excellent visibility for the night-riders.

#### LED Turn Signals

The amber diamond cut SMD LED turn signal is covered with a transparent shield. It enhances the brightness and visibility for riding at night.

(more)

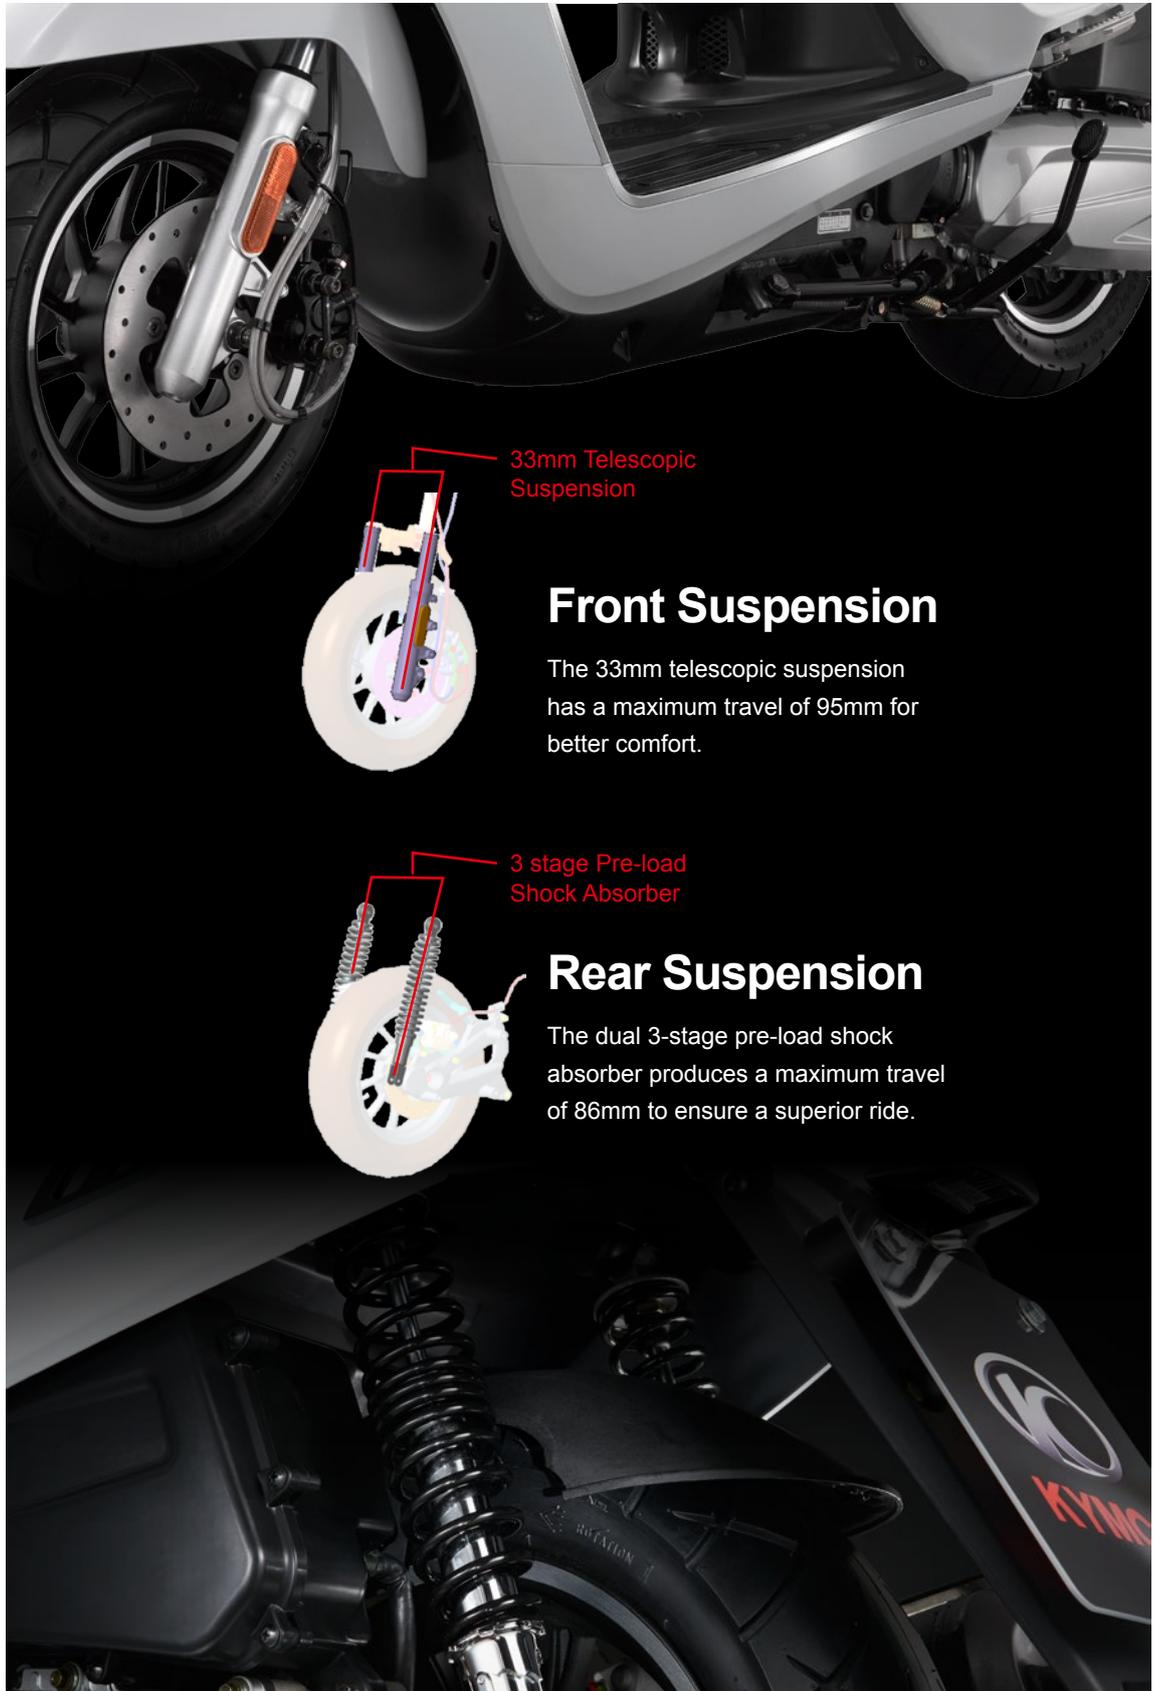

The rear LED lighting design is both elegant and distinctive. The LED braking light utilizes a clear lens and direct-backlit technology to differentiate from the running lights. The rear indicators are made of amber LEDs with a transparent shield cover.

33mm Telescopic Suspension

### Front Suspension

The 33mm telescopic suspension has a maximum travel of 95mm for better comfort.

3 stage Pre-load Shock Absorber

### Rear Suspension

The dual 3-stage pre-load shock absorber produces a maximum travel of 86mm to ensure a superior ride.

## Bosch Anti-lock Braking System (ABS)

- The 9.1M Bosch ABS weighs only 0.7 kg and is currently the lightest anti-lock braking system in the industry
- Bosch ABS is most reliable and acts faster during emergency braking.
- Bosch ABS operates with the front and rear brake disc to shorten the braking distance and provides stability.
- The Bosch ABS works with both the front fork / rear shock and the highly rigid chassis to provide pleasant riding experiences.

### 5 in 1 Ignition Switch

Ignition, seat lock and fuel cap opening functions are combined in one.

### Glove Box with USB Port

A glove box with a built-in USB port is most convenient to store your electronic gadgets.

### Front Gas Fueling Opening

The opening for refueling is located in the front for easy access.

### **Anti-Theft Glove Box**

The glove box can be opened once the key is turned in the ignition switch. It is automatically locked when the handlebar lock is engaged.
